Creating space in your home

Whether you are building or renovating, having enough storage space for all your things will always increase the value of your home.

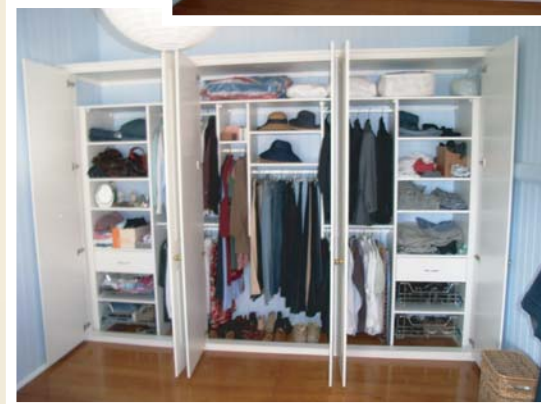

With a wide range of door finishes and styles for the outside of your wardrobe, creating a unique look is easy. And with standard and custom configurations for the inside, there will always be a functional storage solution for your home.

Creative planning

To help you create your perfect storage solution, here are some useful ideas and tips that should be considered when planning your wardrobes.

- Consider the room size in which you intend to install the wardrobe. The ideal depth of a wardrobe is 660mm.
- Check that hinged doors will not open onto hanging light fittings, furniture or doorways, or cover windows or power points.
- Wardrobes should stop short of ornate plaster cornices to avoid interrupting the line and beauty of the plasterwork.
- Uneven floors and walls can be accommodated in most installations.
- Sliding doors are ideal for small rooms as they don't take up precious space.
- To make your room appear larger, choose the right colour exterior. A similar shade of wardrobe to the walls will blend in seamlessly.

- To give the illusion of more space, consider mirrored doors. These will open up the room and reflect the view, allowing you to enjoy it from inside as well as outside.

Beautiful on the outside

The doors of your wardrobe are always on display so our extensive range of door materials and finishes, in either sliding or hinges styles, allow you to coordinate a theme to suit any room in your home.

Clever on the inside

Whether you are choosing a built-in or walk-in wardrobe, it's the internal systems that are the most functional and important. The internal configuration can be designed so changes are easily accommodated as your needs evolve.

A combination of fixed and adjustable shelves will make an extremely practical storage combination. Adjustable shelving can be moved up and down or removed completely to make room for bulkier items.

Drawers and baskets in a range of heights and widths for storing smaller items also provide an adaptable storage solution.

Wardrobe Styles

Sliding Doors

- Powder coated or anodised aluminium frames
- Door panels in vinyl, melamine, plain or routed MDF, mirror and painted glass or polyester panel finishes
- Ask about our other finishes

Hinged and Bifold Doors

- Door panels in plain or routed MDF, melamine, vinyl

Smart accessories

Our wardrobes can incorporate

- Purpose built racks for neat shoe storage.
- Special compartments can be added to store hats and other personal fashion accessories
- Custom made hanging units will neatly store ties and belts
- Chrome or plastic coated wire baskets let you see what is in the drawer without having to open it
